PROJECT TITLE

EMPLOYEE SALARY ANALYSIS USING EXCEL

AGENDA

- 1.Problem Statement
- 2.Project Overview
- 3.End Users
- 4.Our Solution and Proposition
- 5.Dataset description
- 6.Modelling approach
- 7.Results and discussions
- 8.conclusions

Problem statement

Employee salary statement is for to check in the organization the salary of the employee because of his work and dedications.

Project Overview

In the salary analysis it is to compare for the other employees salary and there work and field .
In types of department.

Who are the end users

The employees are the end user for the company who knows the work and benefit to the company. The employees know the work and solutions to sought if there is the problem in the company employees can manage easily and handle in the proper way.

Our solution and its proposition

FILTERING- it is used to filter the data you need.

CHART-LINE CHART- it is easy to understand by visualization. And to compare with others.

Dataset description

1.Employee data set- Kaggle

2.26 features

3.Features –2 features

4.Name

5.Salaries

Modelling

DATA COLLECTION- From edunet dash board.

DATA CLEANING- The needed data is used.

TECHNIQUES – Filter, line chart.

RESULTS- Easy to understand.

CHART&GRAPH- Easy to understand and visualization.

Results

Conclusion

IN THE CONCLUSION WE KNOW TO LEARN ABOUT THE EXCEL AND THE USAGE OF EXCEL.BY KNOWING THE IMPORTANT OF THE,CHART &GRAPHS ,AND FILTER.

ABOVE IS THE SUMMARY OF THE EMPLOYEE SALARY ANALYSIS USING EXCEL.
